

46 Walkaround

WALKAROUND | EXPRESS | GAMEBOAT | FLYBRIDGE

Bold

A sharp entry, a purposeful bow, and a sheerline that won't be ignored—the Release 46 Walkaround makes a statement from every angle.

Pedigree

The Release 46 doesn't whisper pedigree. It announces it. From the cockpit to the tower, every line is intentional, every detail uncompromising.

The Release 46 Walkaround doesn't play it safe—and that's exactly the point of everything we do here in Egg Harbor, New Jersey. In our opinion, life is too short to build ugly boats. This is a boat designed to turn heads, with a look that balances classic lines and fearless modern attitude. Every curve, corner, and camber was drawn with purpose—built to fish hard, run fast, and look damn good doing it. The low-slung house sits just right, giving you a commanding presence at the helm and a profile that's pure Release.

Every 46 we build begins with your vision and is created through our obsession, shaped by hands that know the difference between bespoke and cookie-cutter. From our resin-infused hulls to the flawless joinery, the 46 is a masterclass in modern boatbuilding rooted in tradition. Every inch is considered, every finish intentional. To us, it's not just how the boat looks—it's how it feels. Give us a call and let's talk boats!

JIM TURNER
Founder

VACUUM-INFUSED RESIN

Release utilizes a state-of-the-art vacuum-infused resin molding process.

CRAFTSMANSHIP

The build process begins with our team: experienced offshore tournament fishermen.

COMPOSITES

Our boats are 100-percent composite, not wood, using only the finest materials.

There's something special when an individual walks into the Release Boatworks shop in Egg Harbor, New Jersey. Right in front of you are the visions of experienced anglers coming to life through the passion and expertise of the team of craftsman, designers, and boatbuilders. It's this collaboration that makes the environment feel alive.

And we don't build boats for the masses. We build for the few who understand this collaboration and what really matters—the ride, the lines, the feel under your feet when everything just works. A Release isn't about flash. It's about fishability, integrity, and a kind of quiet confidence that only comes from time on the water. Designed with intention. Built with pride. And delivered with zero compromise. This is custom, the way it used to be—and the way it always should be. That's the Release Way.

360

degree fishing capabilities on our Walkaround models, normally found only in center console boats. But with Release Boatworks, you also get luxurious below-deck accommodations and amenities.

4

different variations are offered for the Release 46. The Walkaround (shown on these pages), the Express; the Gameboat, and the Flybridge. And our team offers to customize these models to the needs of every owner.

TAKE COMMAND

From proper fish boxes and live wells to teak underfoot, the cockpit on the Release 46 Walkaround isn't just a design feature—it's a stage set for serious fishing.

Every Release helm is laid out with the captain in mind—clean sight-lines, intuitive controls, and no wasted motion. And the 46 WA's properly designed cockpit is all about purpose. It's wide, flush, and open—built to give the angler every advantage. Everything has its place, from rigging stations to insulated fish boxes, with nothing in the way when the bite turns on. We recognize that a cockpit is a tool. And when it's done right, you feel the difference the second the lines go tight.

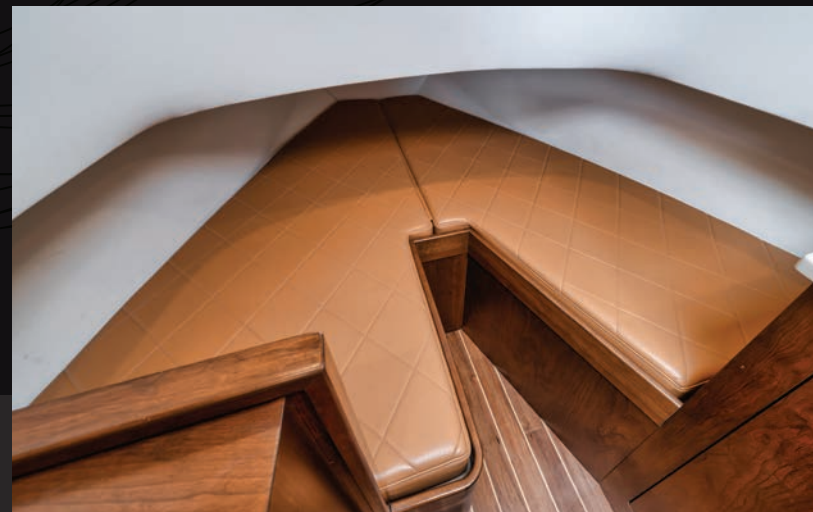

CRAFTED

You don't build a Release Boatworks Walkaround—you *craft* one along with a passionate team of boatbuilders who share in your dream and vision.

Step below and see what details really mean—fine joinery, smart stowage solutions, and interior layouts that blend luxury with the demands of long days offshore. The nicely equipped galley can serve equally well on an offshore run with a crew of hungry anglers or a fun-packed weekend with the family.

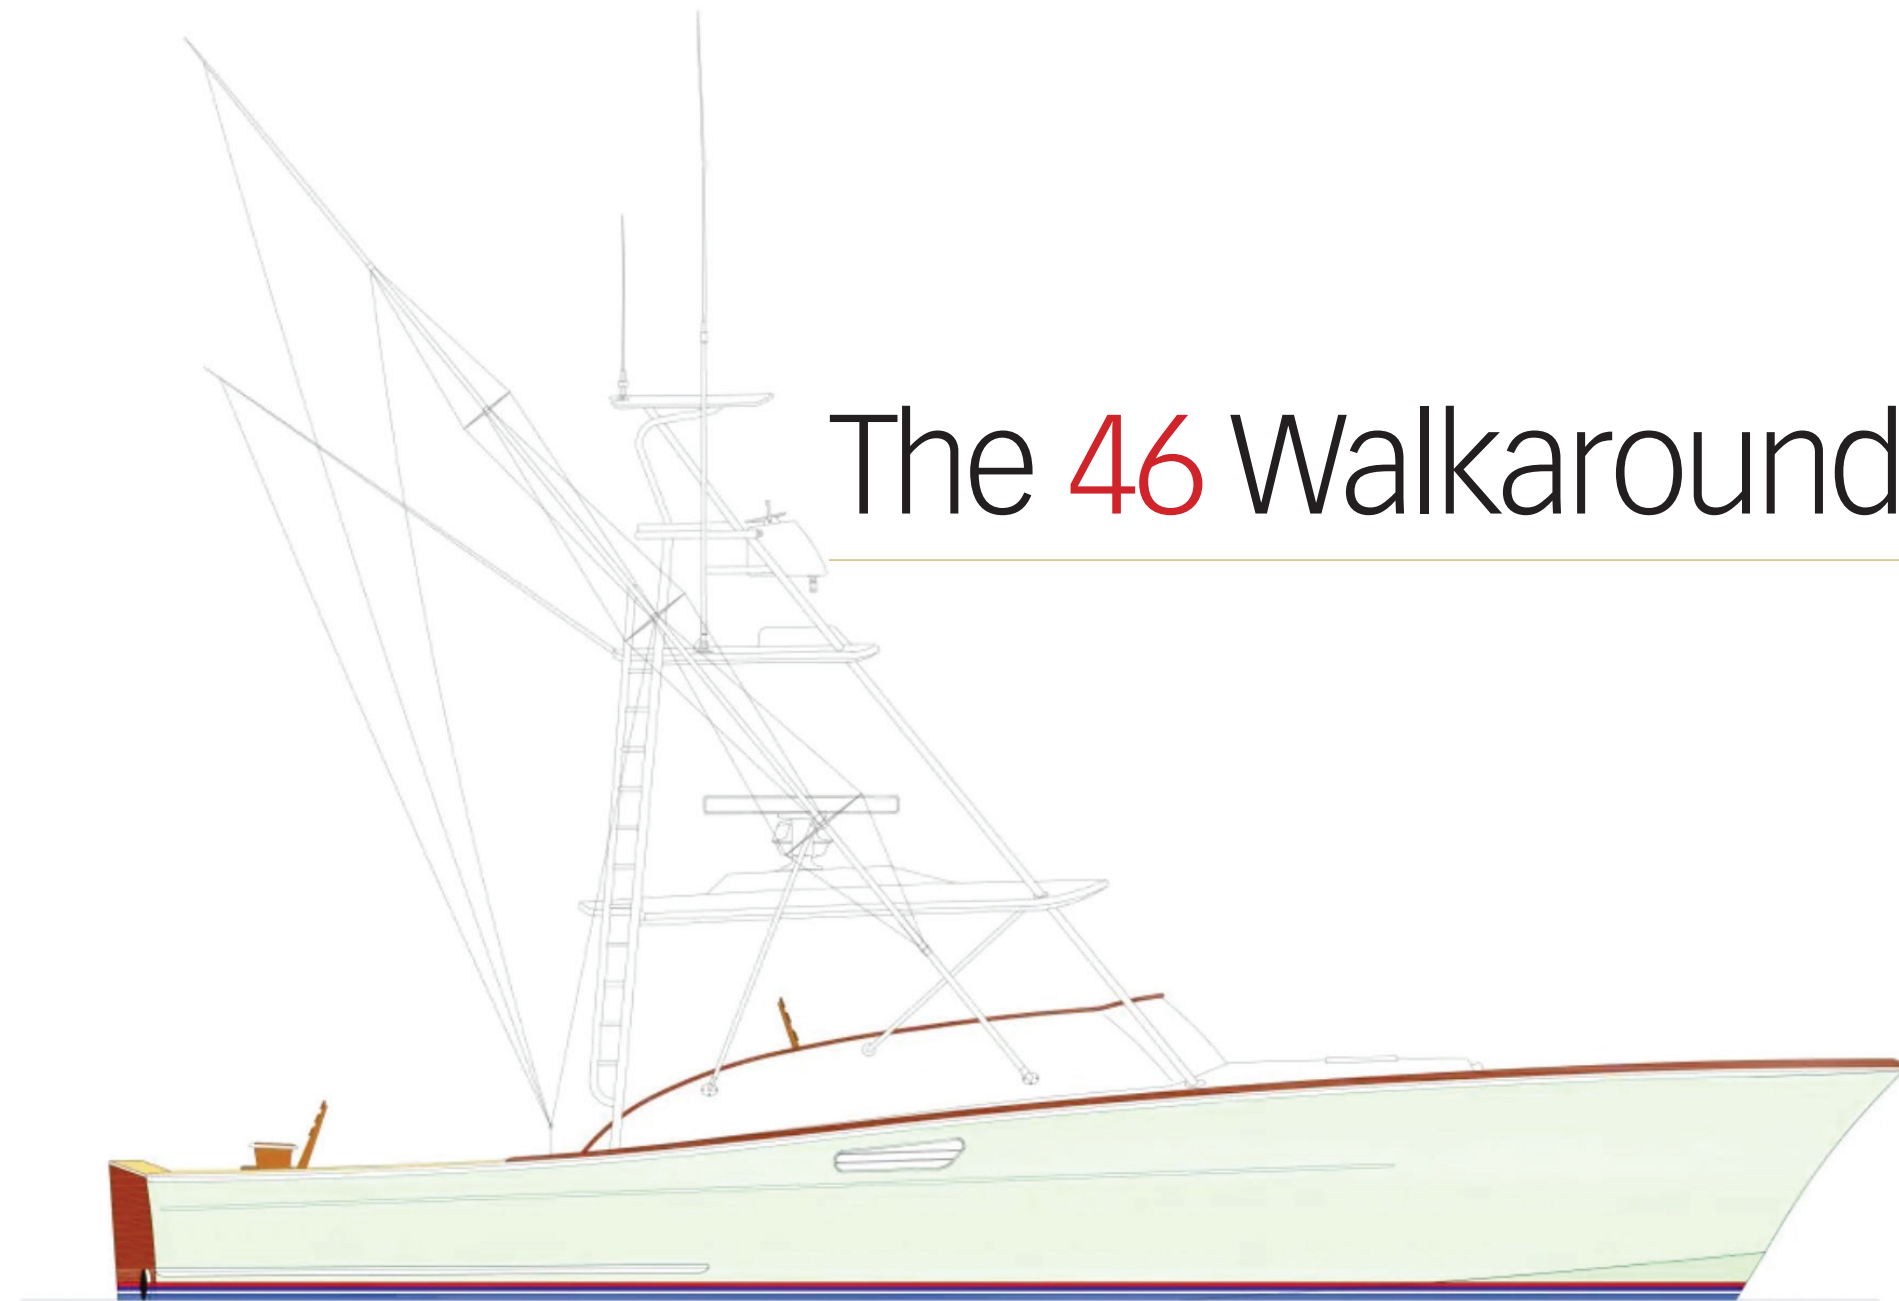

Responsive at the helm, balanced in any sea—the 46 is built around its superior ride.

The Walkaround configuration allows for 360-degree fishability. Whether you're chasing tuna offshore or pitching baits inshore, this 46 WA gives you unmatched versatility, unrestricted lines of sight to the action, and the confidence to work every inch of the boat. The tower adds yet another element to make this the ultimate fishing machine.

The 46 Walkaround

The Release Boatworks 46 Walkaround delivers what no center console or convertible can on its own: total 360-degree fishability with the comfort and capability of a traditional convertible. With wide, secure side decks and a flush layout, anglers can follow a fish from the transom to bow without missing a beat—no steps to trip on, no hesitation. It's the freedom of a center console, with the ride, protection, and onboard comfort of a convertible.

46 WALKAROUND

LOA: 46'

Beam: 15'9"

Deadrise: (at transom) 14.5°

Draft: 3'2"

Displacement: 35,000 lbs

Fuel Capacity: 720 gal

Water Capacity: 70 gal

Holding Tank Capacity: 10 gal

Cockpit Area: 150 sq ft

CONSTRUCTION

- Petit bottom paint, 2 coats, primed
- Blister-resistant vinylester resin in entire hull skin
- Custom-blended modified epoxy and polyester resin used in structural laminates & topsides
- Dockside and overboard pump-outs
- DuPont high-gloss polyurethane boot stripe
- Satin cherry interior finish throughout (Options available)

- Hull constructed using Airex foam cores with Aramid and E-glass hybrid fiberglass laminates
- Hull interior – gelcoat topcoat
- Aluminum fuel tanks and molded freshwater and holding tanks
- Molded fiberglass engineroom ceiling with core for acoustical and thermal insulation
- Stringers – fiberglass encapsulated foam
- Vacuum-infused composite bulkhead

CONSTRUCTION

- Air Conditioning – direct expansion zoned with reverse cycle heat for complete climate control throughout the interior
 - Bilge pumps with additional clean-out pumps on centerline linked into monitoring system and connected to switches for automatic and manual operation
 - Optimus fly-by-wire steering
 - Engine room ventilation system
 - Fire-suppression system
 - Fuel and oil lines, USCG approved
 - Fuel priming pumps electric 24V DC, for main engines
 - Mufflers – in-line type with surge tubes
 - Oil-changing system
 - PEX plumbing throughout
 - Pressurized freshwater system, 24V DC pump with on-deck freshwater fill and cockpit dockside supply inlet
 - Propellers – Nibral
 - Racor fuel-water separators for main engines and generator
 - Rudders w/ composite rudder bearing and dripless seal
 - Seacocks – stainless steel ball-type sea valves
 - Shafts – 2 Aquamet high-strength stainless steel
 - Struts – Nibral
 - Trim tabs, with individual controls
 - Twin diesel engines with marine-grade reduction gears
- *See manufacturers

PURPOSE-BUILT

Every Release 46 Walkaround starts with a simple question: What does a serious sportfisherman need, and nothing more? That's the mindset behind every hatch, every layout decision, every system we install. From the clean cockpit design, to the wide-open engine access that makes maintenance a breeze, the 46 and every Release is all business—designed for long runs, quick turnarounds, and full-contact days offshore. No gimmicks. No fluff. Just the right features, exactly where they should be.

THE 46 IS NOT TRYING
TO IMPRESS EVERYONE

From the moment the Release 46 Walkaround comes over the horizon, the sharp entry, generous flare, and assertive stance speak volumes.

Performance isn't an option—it's the backbone of the Release 46 and indeed every boat we build. Designed by Erwin Gerard, the hull is fast, efficient, and unshakably confident, no matter the conditions. This is a boat that's just as comfortable running 35 knots offshore as it is backing down hard. Responsive at the helm, balanced in following seas, and dialed-in from the props to the tower—the 46 is built to be driven, not just owned.

—JUST THE ONES WHO KNOW.
